OceanWorks International Upgrades Indoor Training Tank

Burnaby, British Columbia - [OceanWorks International](http://www.oceanworks.com/) has recently completed a major overhaul of its main Indoor Water Tank. The 16' x 25' steel tank with a capacity of over 118,925 litres of water is not only an integral part of the testing regimen for OceanWorks customized subsea engineering systems, but has been used on many occasions by the film industry for scenes in motion pictures and TV shows.

The upgrades completed include the refinishing of the tank walls, replacement of the floor mats, replacement of the pump and filtration system, and the installation of new tempered high strength and clarity glass allowing extremely clear viewing of the systems being tested.

OceanWorks Technicians Barry McBride (left) and David Gunby) put the finishing touches on the new viewport
